INTERVIEW SUMMARY

Mail Stop AF
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This Interview Summary is submitted for the interview carried out by phone on February 23, 2006 at 11:00 AM between the Examiner Vickie Y. Kim and the Representative for the Applicant, Mark A. Buese, Patent Agent.

The Representative for Applicant introduced the superoxygenated composition common to all claims of the present invention as defined in the specification to be that of oxygen microbubbles in a pharmaceutically acceptable fluid, contending that these compositions were not equivalent to the microbubbles for gas transport containing perfluorocarbons in cited reference US Patent No. 6,127,428 the peroxide containing would dressing of U.S. Patent No. 5,792,090 or the gel with increased oxygen content of U.S. Patent No. 6,139,876.

The Examiner focused on the claims as recited, pointing out that the claims should be clear and concise and that the direct application to the tissue and the exclusion of perfluorocarbon or other gases from the microbubbles must be distinguishable in the claims from the teachings of the cited art as the limitations from the specification are not read into the claims.

No amendments were proposed and no agreement was reached.

Respectfully submitted,
AKERMAN SENTERFITT
